

SOLVENT-BASED GLOSSY POLYURETANE COATING

DIRECT-TO-METAL

TOPCOAT

# NORMAFINE 80

## More environmentally friendly high solids polyurethane coating

When challenging industrial sites require a high durable surface,  
**Normafine 80** is the right choice. This high solids glossy acrylic  
polyurethane topcoat and single-coat enables cost-effective painting  
with environment in mind.

### WHY TO CHOOSE NORMAFINE 80?

#### SUPERIOR DURABILITY

Hard surface corrosion  
resistant direct-to-metal  
coating.

#### WEATHER RESISTANT

Excellent UV-resistance.

#### STYLISH END-RESULT

Glossy and smooth finish.

#### GREENER CHOICE

No solvents defined as  
HAPS or environmentally  
toxic zinc.

# DURABLE FINISH COST-EFFECTIVELY

Thanks to its durable surface, Normafine 80 provides excellent protection against UV radiation and corrosion. As a high solids acrylic polyurethane coating, it is also a more environmentally friendly choice.

## Superior end-result with just one layer of paint

Used as a direct-to-metal coating, Normafine 80 offers a stylish finish in just one coat. This fast-drying, cost-effective product enables a fast painting process.

## A greener choice

Normafine 80, a high solids coating, doesn't contain solvents defined as HAPS or environmentally toxic zinc. From solvent-based coatings, it is clearly a safer option for both the user and the environment.

## It's time to lower the VOCs

We are constantly developing more environmentally friendly products, which include solvent-based high solids products. By reducing the amount of solvents and changing the quality of solvents and other raw materials, we are able to offer greener and safer products.

Updated Technical Data Sheet (TDS) and Safety Data Sheet (SDS) and our general conditions of sales are available at [www.nor-maali.fi](http://www.nor-maali.fi). In case of differences in information: the order of priority of information is TDS and SDS over any other information.
